Up Coming Course

Why and for who?

Adobe © Photoshop CS6, the benchmark for digital imaging excellence, provides strong performance, powerful image-editing features, and an intuitive interface. Adobe Camera Raw 5, include with Photoshop CS6, offers flexibility and control as you work with raw images, and now you can apply the same tools to TIFF and JPGE images, as well. Photoshop CS6 pushes the boundaries of digital image editing and helps you turn your dreams into designs more easily then ever before.

Photoshop CS6 is intended for graphics, marketing and publications officer to be able to produce a broad range of images for use in documents including newsletters, product leaflets, adverts, posters and sales material. The course is also suited for the creation of on-screen and internet images.

What will you learn?

Adobe © Photoshop CS6 feature a newly refined, tab-based interface in a single, integrated window, with self-adjusting panels arranged in docked groups. Automatically keeping tools well organized and away from your work area means you get greater efficiency, less clutter, and better results, faster than before.

In this course, we provide simple step-by-step instructions in learning Photoshop CS6 features, starting with fundamental concepts and features you'll need to master the program and yet you will learn the advance features such as photo retouching, color management, correcting and enhancing digital photographs, including tips and techniques for using the latest version of the application and for preparing images for web.

There are many new features covers in Adobe Photoshop CS6, such as the Adjustment panel, making it easier than ever to add nondestructive adjustment layers; Mask panel, which can let you quickly create precise mask in the Mask Panel and gives you greater control over masks and channels; and the Advance Compositing, lets you create more accurate composites using the enhanced Auto-Align Layers command, and use the spherical alignment to create 360-degree panoramas. In addition, these lessons also introduce you to enhancements to Camera Raw, manipulating, positioning, convert 2D images to 3D objects and.

During the workshop, we provide step-by-step instructions on :
